Specification

1. The substitute specification filed Feb 28, 2008 has been entered.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: assigning a prize value to each of the plurality of words in the play phrase as a function of the commonality (frequency distribution) of letters that form each selected word in the play phrase in combination with other steps/features is deemed allowable. Word games such as Scrabble or its hybrids assign a point value to each letter of alphabet as a scoring scheme in word game where the assignment of points to each letter is a function of commonality (relative frequency distribution) of letters used in English language. Games of chance implicitly rely upon frequency distribution of indicia for assigning probability occurrence and thereby assign or determine a prize value. However, use of such scoring process in combination with general methodology in chance games to assign prize value does not appear to suggest claimed invention. For instance, Koza, Guttin, Bearlocher or Walker in combination with such scoring process that assigns points to letters as a function of relative frequency of each letter as in Scrabble or noted hybrids does not appear to suggest claimed invention at least due to scoring scheme to determine points for each word in a word game does not suggest assigning a prize value as a function of frequency of letters of each word. Finally, the commonality of letters of each word in the play phrase appears to be the relative distribution of those letters usage in English language rather than their frequency within a selected word.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
